

ANDERIDA ADOLESCENT CARE

SEXUAL HEALTH POLICY

All mentors receive training in sexual health, sexuality, harm minimisation and how to approach young people about these issues. The home will ensure these issues are covered in education at school and where they are not covered, or young people have missed this education, ensure there is extra provision made to educate around sexual health and healthy relationships.

Literature will be made available to the young people in the home and mentors will ensure that young people are confident in speaking to them about their sexual health. Young people will be made aware of statutory and voluntary agencies where they can discuss all the above issues and access further help (see health policy). The SAS nurse will, where appropriate be invited to come to the home or to school, and the young people's health plan will reflect the input in this area.
